

## SIMPLIFY YOUR TRAINING AND COMPLIANCE PROGRAM FOR PHYSICIANS OFFICES AND MANAGE IN ONE PLACE

### LEARNING MANAGEMENT SYSTEM

- MedTrainer has identified the topics and training requirements that are most important to medical practices by talking to you.
- MedTrainer has put these training topics into customized curriculums and toolkits that are available to help stay in compliance.

### FEATURES AND BENEFITS OF MEDTRAINER

- More than 100 courses are organized and easy to access- no matter where you are- what kind of electronic device is used- and no matter how many locations need immediate access.
- Helps prepare for audits, surveys and inspections before they happen using internal auditing tools for OSHA, CMS, Environment of Care and more.
- Create, update and manage required safety plans for your

office including fire safety, injury and illness prevention, exposure control and many more.

- Generate and maintain incident reports for multiple locations like HIPAA violations, sharps injuries, and patient complaints.
- Helps manage safety data sheets (SDS Sheets) effectively and efficiently.
- Distribute information to staff and collect e-signatures for policies, procedures recall notifications, and important announcements.
- Add facility-generated training materials, presentations and other custom content.

### PATIENT CARE SKILL BUILDING

- Preventing Patient Falls
- Identification of Child Abuse and Neglect
- Identifying Elder Abuse and Neglect
